PRAJWAL RAVINDRA DESHPANDE

Computer Engineering graduate with hands-on experience developing AI/ML applications.

+917249830959 prajwaldeshpande.skn.comp@gmail.com GitHub LinkedIn Pune, India

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience developing AI/ML applications, deep learning models, and Retrieval-Augmented Generation (RAG) systems. Proficient in Python and Java, with project experience using TensorFlow, ChromaDB, FastAPI, Flask, and React. Interested in building practical AI solutions and pursuing opportunities in AI/ML engineering.

EDUCATIONS

Smt. Kashibai Navale College of Engineering | Pune — Jul 2022 - Jun 2026
B.E. in Computer Engineering — *CGPA : 8.02*

Adarsh Vidyalaya High School | Jalna — Jul 2021 - Jun 2022
Class XII (Science, Non-Medical) — *Percentage : 78.5%*

Saraswati Bhuvan High School | Jalna — Jul 2019 - Jun 2020
Class X — *Percentage : 88.4%*

PROJECTS

Crop Disease Prediction | Github Website

Developer

Crop Disease Prediction System | Python, TensorFlow, React

- Developed a machine learning system to identify crop diseases from leaf images using deep learning techniques.
- Implemented image preprocessing and model training using the PlantDoc dataset to classify crop diseases.
- Integrated MobileNetV2 with a backend API and React frontend to support image-based disease prediction.
- Evaluated model performance and achieved 95.05% test accuracy, demonstrating effective crop disease classification.

Technologies: Python, TensorFlow, MobileNetV2, scikit-learn, Flask, React, PlantDoc Dataset
***:** Python, TensorFlow, MobileNetV2, PlantDoc, Flask, React, CNN*

Multimodal RAG System | Python, ChromaDB, CLIP | Github

Developer

- Developed a multimodal Retrieval-Augmented Generation (RAG) system to retrieve relevant information from PDF documents using text and images.
- Implemented PDF text and image extraction, text chunking, and embedding generation for efficient document retrieval.
- Integrated ChromaDB, Sentence Transformers, and CLIP embeddings for vector-based storage and semantic retrieval of text and images.
- Used Python, PyMuPDF, and OpenRouter to support context-aware question answering using retrieved document content.

Technologies: Python, ChromaDB, Sentence Transformers, CLIP, PyMuPDF, RAG, Vector Search, OpenRouter

SKILLS

Databases :	MySQL, ChromaDB
Frameworks & Libraries :	Deep Learning, CNNs, Data Preprocessing, Model Training, Model Evaluation, RAG, LLMs, Prompt Engineering, OpenRouter, TensorFlow, Pandas, NumPy, LangChain, FastAPI, Flask, Spring Boot, React
Languages :	English, Hindi
Programming Languages :	Python, Java, SQL
Tools & Platforms :	Git, GitHub, VS Code, Jupyter Notebook

CERTIFICATIONS

- **AI/ML for Hydro-Informatics** — Indian Institute of Remote Sensing (IIRS), ISRO | October 2026
- **DSA with Java** — WAY2LOGIC

LANGUAGES

- English
- Hindi
